1 Scope

This regional standard specifies requirements for the purity, treatment, bacteriological acceptability, packaging and labelling of all waters that are pre-packaged for sale and used as beverages or in foods.

This standard does not apply to water distributed by the public water supply system, to carbonated beverages, soda water or to packaged water sold for purposes other than as a beverage.

This standard should be used in conjunction with CRCP 1, Code of Hygienic Practice for Packaged Water.
